

I am skilled with multiple programming languages, such Python, Java, JavaScript, C++, and others. My experience covers a variety of tasks, involving automation, machine learning, data analysis, and developing websites.

## **Familiarity with JavaScript**

As a developer on various web development tasks, I have a great deal of knowledge with JavaScript. I know how to utilize both basic JavaScript and frameworks and libraries like Angular, Vue.js, and React. I have worked on front-end initiatives using JavaScript, server-side programming using Node.js, and developing APIs that use REST.

## **Target Grade for This Unit**

I am aiming for HD.
